

THE MAGIC

of me

Mobile Activity

The Magic of Me Mobile

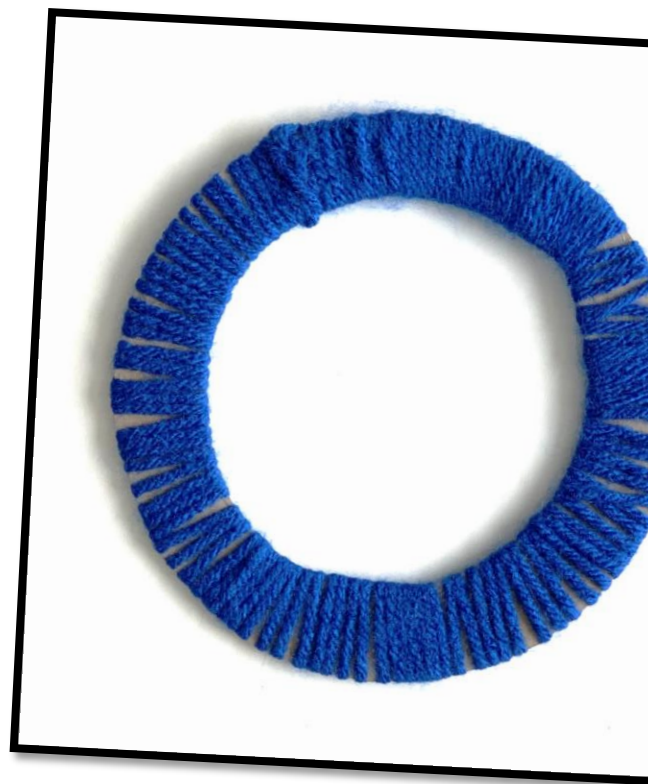

1

*Added an optional cardboard ring

2

Wrap Ring With string

The Magic of Me Mobile

3

Punch holes in the cloud and affirmation circles

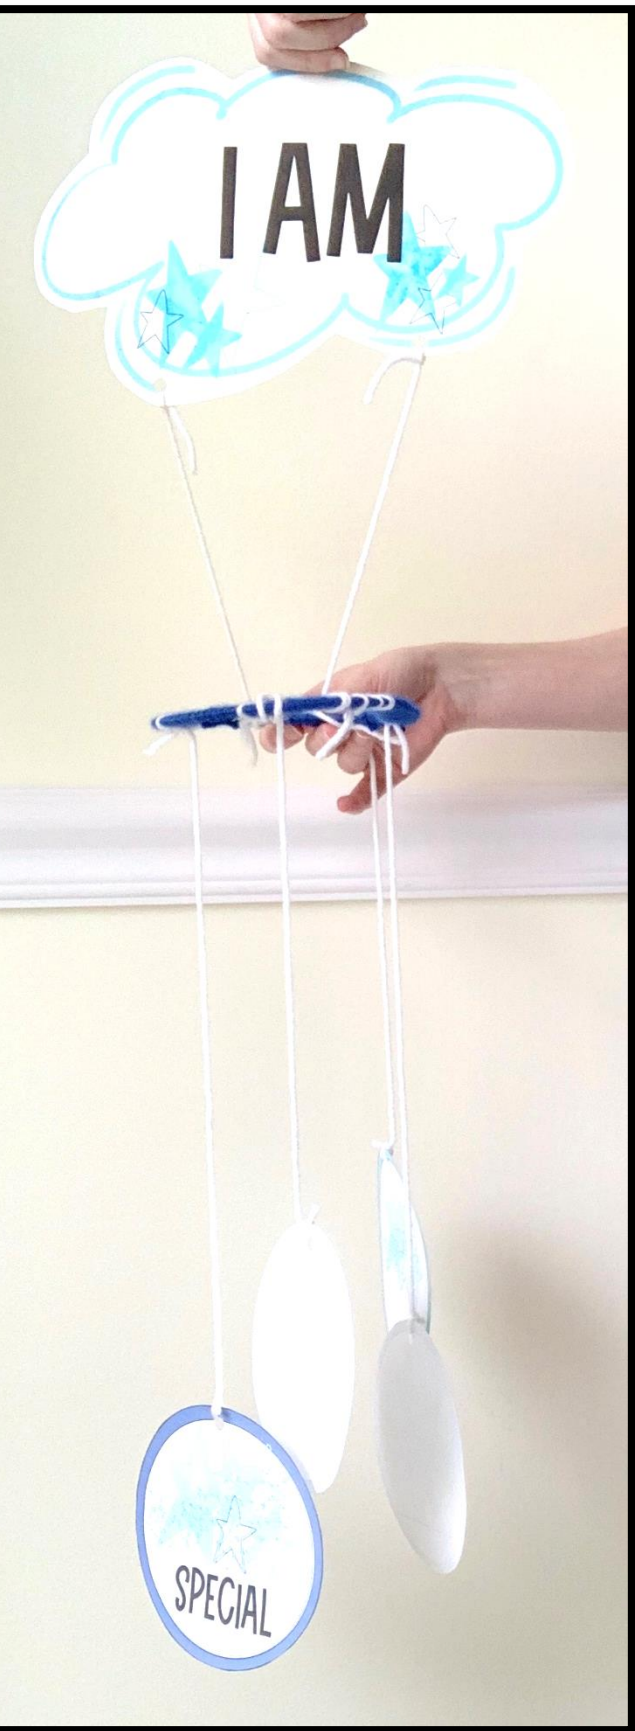

4

String the cloud and circles

The Magic of Me Mobile

5

Put together!

The Magic of Me Mobile

Purpose of Activity

Once students have an idea of what affirmations are, encourage them to determine what affirmations resonate with them. Students can build this mobile to be hung in the classroom as a reminder for themselves as to what things they love about themselves. Students can also take this activity home and lead a discussion with grown ups on what types of affirmations resonated with them from the book.

Materials Needed

Teacher

- White or Astro Bright Paper (teacher preference)
- Objects to hang the mobile from if you don't want to hang it just from the cloud
 - String
- Single Hole Puncher
- Scissors

Student

- Pencils/pens
- Crayons/markers
- Scissors

How to Assemble

Before starting assembly, students will decide if they want their mobile hanging from the cloud or some other object.

Once students have decided on which affirmations they'd like to use, print out the appropriate pages and allow time to color. Students (or teacher) will cut out the circles. Punch one hole towards the top of each circle to attach string to (teacher guidance).

Punch multiple holes towards the bottom of the cloud if students are using the clouds to hang their affirmations.

Please use the pictures provided for examples.
